Dad, Football, Karting, Camping

👤 PROFILE

Everywhere I went, I was always prepared to improve processes, learn and innovate in the way things were done.

I was responsible for ERP operations with units all over Brazil, WEB systems, server maintenance, networks and telephony.

I've worked on creating and implementing server and network infrastructure projects.

I enjoy working in teams with knowledge of technology and who speak the same language.

My last job as a Senior Scrum Master helping teams develop software using Agile Methodologies, where I started as a Web Full Stack, and then improved my skills as a manager and technical leader.

Analyst and developer. MySQL, PostgreSQL, React Native, current Angular and Python enthusiast.

People Management, focus on Productivity and Delivery with Agile methodologies.
